### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest a lock member for mounting a container roll-in/out platform to a pallet, the lock member including a housing including a top wall, a front wall and a rear wall, a shaft having a first end and a second end, the first end of the shaft attached to the top wall of the housing, a head attached to the second end of the shaft and a block extending around the shaft between the top wall of the housing and the head, the block adapted to be rotatable about the shaft with respect to the housing and the head. The patent to Mowatt-Larssen teaches a housing(17)(fig. 13), shaft having a first and second end, the first end attached to the top of the housing, a head (52), block(pad) (46). However, the block is welded on the top plate and not rotatable about the shaft with respect to the housing and head as claimed. There would be no motivation to modify such an arrangement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
